

✓ Insect Protection

PressFit™

No-screw retractable screen for
standard-sized windows and doors

Up to 2.4m wide and 2.2m high

 **PHANTOM**
SCREENS

phantom-screens.co.uk

Double door screens are ideal for conservatories keeping them cool and insect free

Pull across screens work well in bedrooms to stop you getting bitten at night

Pull down screens can be used to cover more than one window simultaneously

Single door screens allow you to access outdoor areas while keeping insects at bay

Let fresh air in and keep insects out

PressFit screens are designed to perfectly match white uPVC doors and windows and give you maximum insect protection without the need for screws. The screens simply stick to your window or door frame using strong adhesive strips. The cassette frame of the screen creates a complete seal so there are no gaps around the edges where insects can enter and the retractable design means that the mesh is protected and kept out of sight when not in use. Screens can be pulled across or down to suit your opening and feature spring and lock adjusters so the mesh always stays taut.

- No screws - sticks securely to frame so there is no drilling required.
- No gaps - cassette frame stops all insects unlike chains and curtains.
- Discreet - white uPVC housing blends in with frame.
- Durable - retractable design protects mesh from wear and damage.
- Fit and forget - retracts out of sight but is there when you need it.
- Versatile - can be fitted to windows, doors or double doors.
- Always taut - spring lock adjuster ensures mesh remains taut.
- Smooth action - tension lock adjusts recoil so screens retract smoothly.
- Made-to-measure - we cut screens to size for a perfect fit.

A. Single Door

Width: 200-1200mm
Height: 520-2200mm

B. Double Door

Width: 400-2400mm
Height: 520-2200mm

C. Pull Down Window

Width: 450-2200mm
Height: 200-1200mm

D. Pull Across Window

Width: 200-1200mm
Height: 450-2200mm

Colours

White only.

Mesh and Fabric

Standard 18/14
insect mesh.
